CHAPTER-14
BIRDS COME, BIRDS GO

PRACTICE WORK

1. If $\Delta = 5$, $\square = 10$ and $\circ = 20$, then

Ex: (a) $\overset{5}{\Delta} \overset{5}{\Delta} \overset{10}{\square} \overset{20}{\circ} = 40$

(b) $\circ \circ \circ \Delta \Delta \square \square =$

(c) $\Delta \Delta \square \square \circ \circ \circ \circ =$

(d) $\square \square \square \circ \circ \circ \Delta \Delta \Delta =$

(e) $\circ \circ \Delta \Delta \square \square \Delta =$

2. If $\Delta = 40$, $\square = 50$ and $\circ = 100$

(a) $\circ \circ \circ \Delta \Delta \square \square =$

(b) $\Delta \Delta \Delta \square \square \circ \circ =$

(c) $\square \square \Delta \Delta \circ \circ =$

(d) $\circ \circ \Delta \Delta \Delta \Delta =$

(e) $\circ \square \circ \square =$
