

**Statistics class-9 Maths By-Ashish Jha**  
**Chapter 14 – Statistics**  
**Exercise 14.1 (solved exercise)**

**1. Give five examples of data that you can collect from your day-to-day life.**

Solution:

Five examples from day-to-day life:

- 1.Number of students in our class.
- 2.Number of fans in our school.
- 3.Electricity bills of our house for last two years.
- 4.Election results obtained from television or newspapers.
- 5.Literacy rate figures obtained from Educational Survey

**2. Classify the data in Q.1 above as primary or secondary data.**

Solution:

**Primary data: when the information was collected by the investigator herself or himself with a definite objective in her or his mind, the data obtained is called primary data.**

Primary data; (i), (ii) and (iii)

**Secondary data; when the information was gathered from a source which already had the information stored, the data obtained is called secondary data**

Secondary data; (iv) and (v)
